Web page

From Wikipedia, the free encyclopedia

(Redirected from Web Page)

A web page or webpage is a document or information that is viewed through a web browser and can be accessed through a computer or mobile device. This information is a format, and may provide navigation to other web pages, frequently utilizing other resources such as images, into their final presentation.

Web pages may be retrieved from a local computer that will allow the user access only to content stored, or it may publish pages on the World Wide Web, where they are accessed using a web browser. Web pages may consist of files of static text and a web browser that requests (static web pages), or may be constructed when they are requested (dynamic web pages) and are more responsive to user input once on the client browser.
